***Specification Objection***

The Abstract should be presented as a single paragraph. Correction is required.

***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 20, 21 and 27 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 20, "a delay device" is defined twice (the first occurrence is in base claim 9).

It is not clear toward what claim 21 is directed since the delay device is defined twice.

Claim 27 has similar problems.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Art Unit: 2816

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 9-11, 15, 28 and 29 are rejected under 35 U.S.C. 102(a/b) as being anticipated by Applicant's Prior Art.

Referring to Applicant's Fig. 1 and page 6 of the Specification, components 2, 3 and 4 are admitted Prior Art.

Fig. 1 shows a delay device 2 as recited in claim 9. Further shown is a device 4 that is seen to anticipate the limitations of claims 9-11 and 15.

Claims 28 and 29 are anticipated for the reasons above.

Claims 9-29 are rejected under 35 U.S.C. 102(b) as being anticipated by Baker et al. (6,445,231).

Figs. 2A, 3A and 9 show a delay device 310/910 and a device 902 as recited in claims 9-12, 14 and 15.

Further shown is a second delay device 216 as recited in claim 13.

Figs. 2A, 3A and 9 show a delay device 310/910 and a devices 302/902 as recited in claims 16-19.

Further shown is a delay device 310/910 or 216 as recited in claims 20 and 21.

Claims 22-29 are anticipated for the reasons above.
